

How to Run

1. Download Unity

2. Type below commands in your local terminal (requires 4.4G):

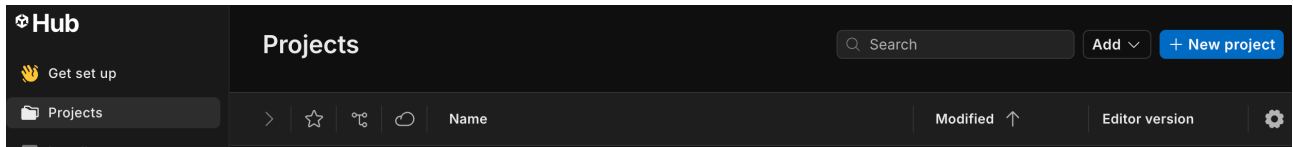

...

```
cd ~/Desktop
```

```
git clone https://github.com/seanyseany/game.git
```

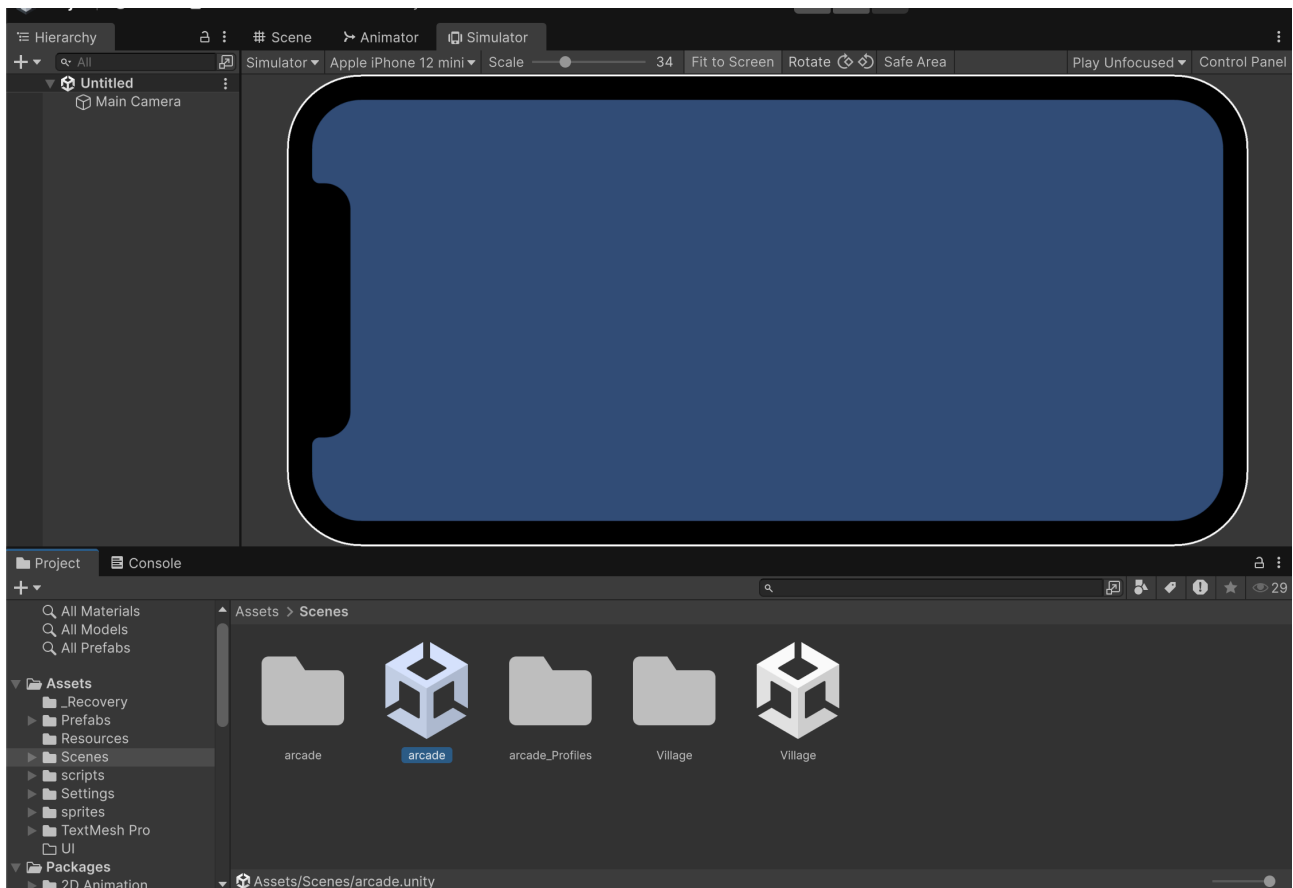

...

3. Go to Unity and find 'Projects' on the left. Click 'Add', and then click 'Add project from disk', find "game" on your Desktop.

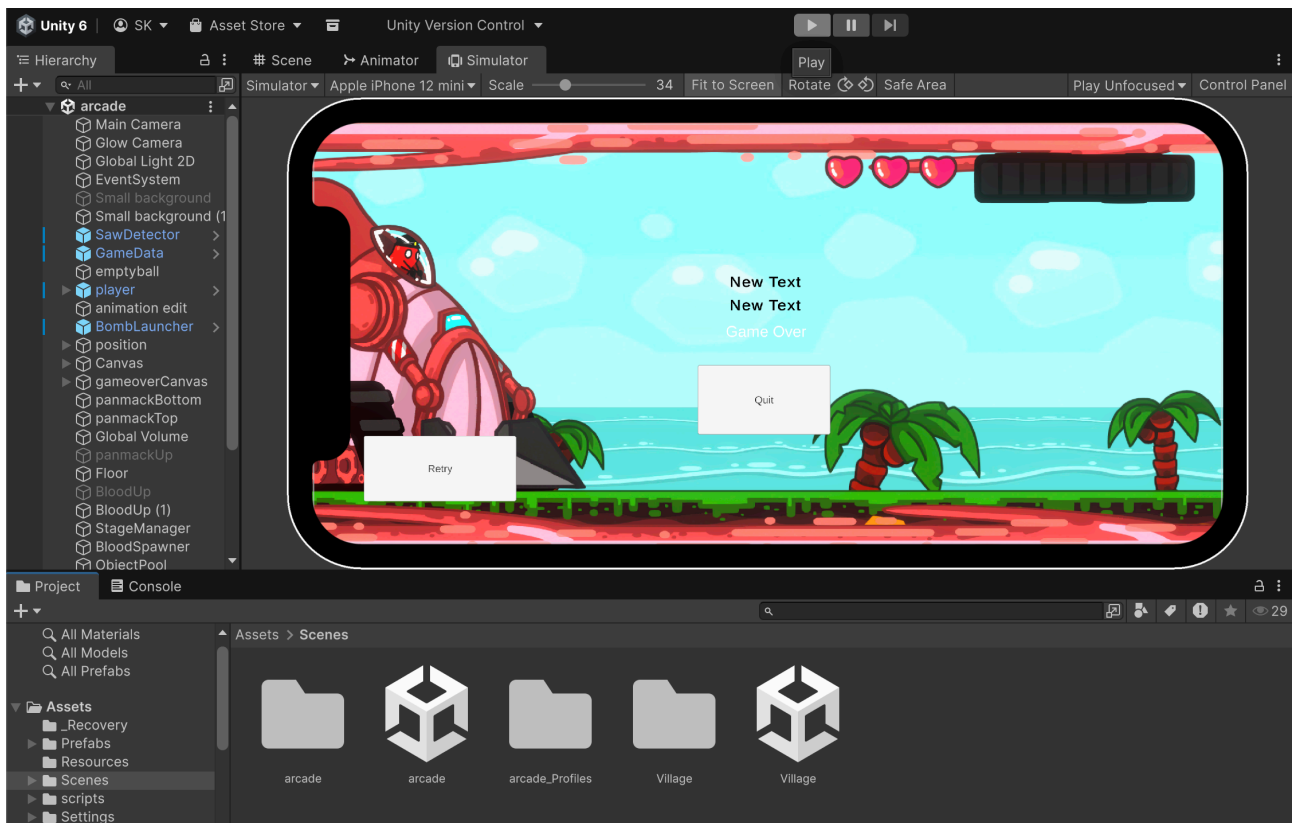

4. Proceed the game by clicking "game"

5. Click 'Scenes' in Assets folder and Click 'arcade'

6. Click play button on the top middle of the screen.

7. Space bar is jump, Down arrow key is attack (click screen if a keyboard doesn't work)

* If you want to change the player type, go to 'GameData'(on the left) and select type(on the right) from 1 to 5.
